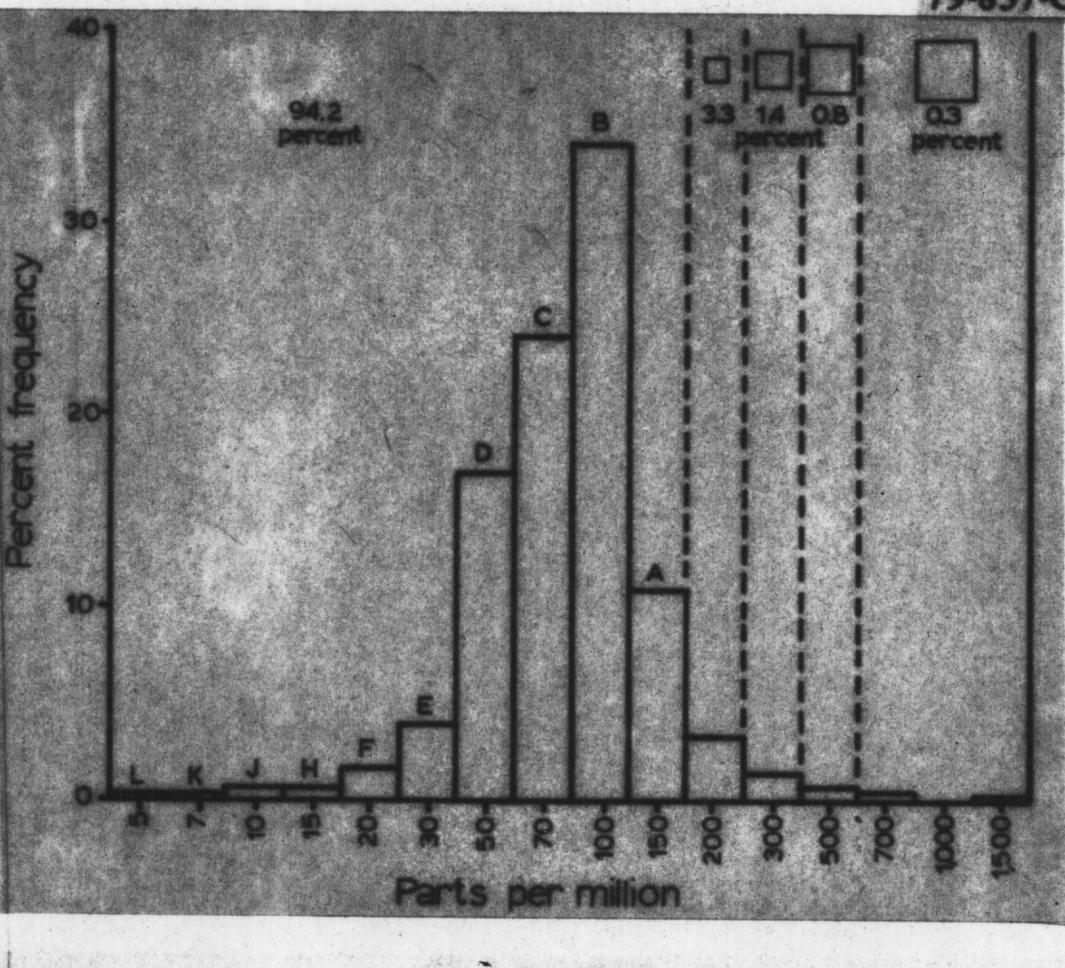

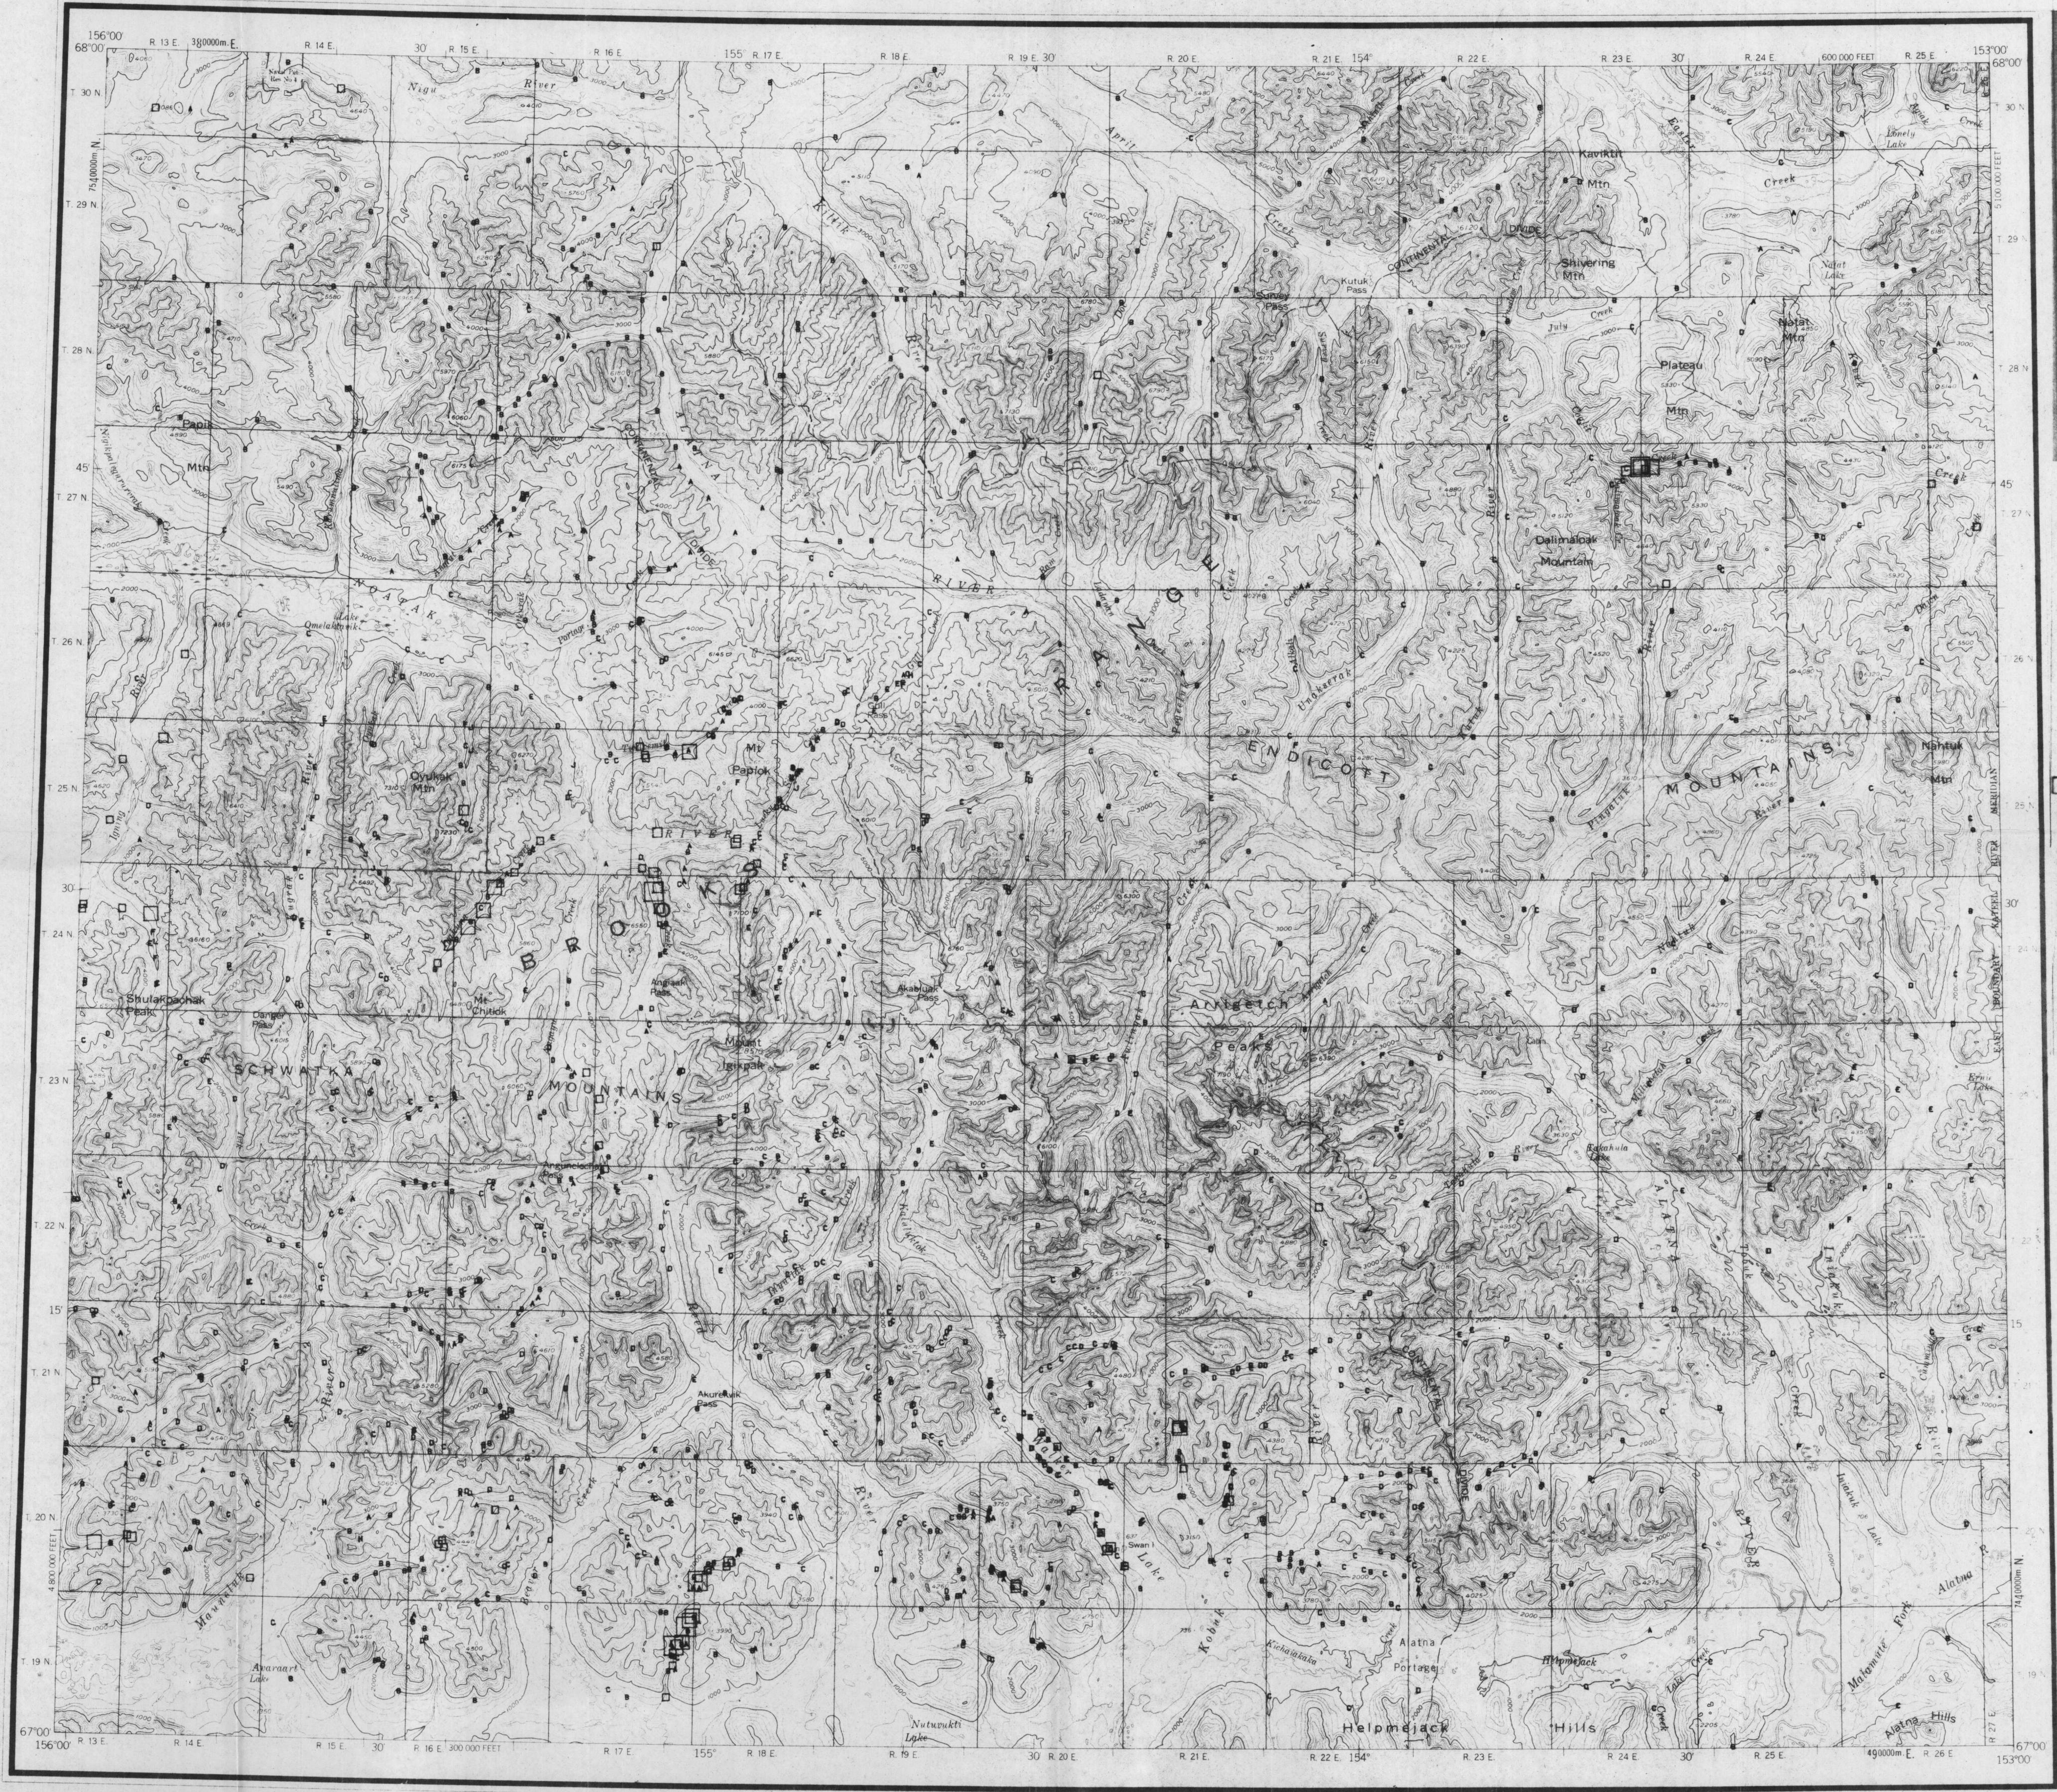

Figure 1.--Histogram for zinc in 1493 minus-80-mesh stream-sediment samples, Survey Pass 1° x 3° quadrangle, Alaska, showing map symbols corresponding to anomalous concentrations in parts per million, percentages of total samples, and letters corresponding to non-anomalous concentrations in parts per million. Arithmetic mean, 96; standard deviation, 75; geometric mean, 81; geometric deviation, 1.7; based on unqualified values within the sample population.

EXPLANATION

ZINC SAMPLE SITES--Letters and size of symbols are explained on histogram (fig. 1)
